Profile Summary

Final-year ECE student building applied AI systems focused on orchestration, retrieval pipelines, and cross-platform integration. Focused on building reliable AI applications with attention to scalability, latency trade-offs, and real-world deployment constraints.

EDUCATION

Ramaiah Institute of Technology, Bengaluru, Karnataka (2022 - 2026)

B.E. in Electronics & Communication (ECE), CGPA: 7.5

Relevant Coursework: Data Structures, Operating Systems, Computer Networks, Java, Python, C/C++

Experience

AI/ML Intern – Beaut Group | Bengaluru | Feb 2026 – Present

- Analyzed end-to-end AI system architecture of a production B2B SaaS platform before contributing to integration and orchestration layers.
- Developed LLM-driven workflows using FastAPI and OAuth, enabling secure cross-platform task execution across internal services.

Projects

RoleFitX | [GitHub](#)

Python, FastAPI, Streamlit, ChromaDB, sentence-transformers

- Built an end-to-end RAG pipeline for resume–JD matching using structured section-based chunking, semantic retrieval, and CPU-optimized embeddings.
- Developed a FastAPI backend with streaming responses and interpretable match scoring, alongside a labeled evaluation framework measuring retrieval performance using Precision@k across curated resume–JD pairs.

NexusChat | [GitHub](#)

Python, Flask, SQLite, HTML/CSS/JS

- Designed and deployed a multi-room real-time chat application using Flask-SocketIO and WebSockets, supporting low-latency (<100ms) message delivery.
- Implemented persistent 7-day chat history with SQLite and deployed on Render using Gunicorn and Eventlet, delivering a responsive HTML/CSS/JS frontend with dark mode support.

Skills

- **Languages:** Python, JavaScript, C++
- **Frameworks:** FastAPI, Flask, React, Streamlit
- **AI/ML:** LangChain, LangGraph, RAG pipelines, MCP, ChromaDB, Pandas, NumPy
- **Databases:** PostgreSQL, MySQL, SQLite
- **Tools & Infrastructure:** Bash, Git, Docker, AWS
